

Dear Andreja Umek Venturini,

I am approaching you in the name of Turku University of Applied Sciences (TUAS), Finland. The school of media and arts of TUAS are interested to participate in the call ICT 36 – Call 3 “Boosting synergies between artists, creative people and technologists”. We are looking for established partnership and project idea that we could join. Currently we are not interested to initiate new planning process. Would you happen to know if in your country there are consortiums developing ideas for this call? We are particularly interested in the Innovation Actions and the Development of a Network, but we would be happy to consider also other actions.

We would be very grateful if you could either forward this email further to the consortiums that you know are preparing to submit an application for this call, or provide us with contact details of those network coordinators.

We thank you in advance!

Kind regards,

Ms Anita Narbro
