### **About Cloud Forward 2016**

Following the successful [CF2015 conference](#) held in Pisa in October 2015, the [Cloud Forward 2016 Conference](#) brings together experts from industry and academia to consider the future of and beyond Cloud Computing. Based on the [HOLA Cloud](#) project and [platform](#) - which documents European research, development and innovation in CLOUDs – the conference will provide the scientific community a dedicated forum for discussing innovative architectures and services in the area of distributed computing (through the *Distributed and CLOUD computing* track), as well as new technologies beyond CLOUDs, requirements and future goals (through the *COMPLETE computing* track). The conference will focus both on research and development efforts in the domain of CLOUDs, and in future scenarios and technologies that exploit CLOUD computing as a utility, such as Internet of Things. The event will be the occasion to revise the [technology roadmap](#) released after CF2015. Integral to the conference, the work of the Clusters of experts working on ‘beyond current CLOUD’ topics will be presented. Finally, a dedicated track for SMEs will be organised to encourage innovation from research.

### **Important Dates**

Paper submission: 03/05/2016

Author notification: 21/06/2016

Camera ready: 31/07/2016
